Sixteen of the charts in the series Visual Education in Dentistry are available in KODACHROME slide form. The size is the usual 2" x 2" and the slides fit any standard projector.

The titles of the slides are given in the box to the right. The slides are reproductions of sixteen of the most popular charts in Visual Education in Dentistry. Many dentists have been using the complete booklet in their practices for quite a few years and total sales now are approximately 110,000.

You will find the KODACHROME slides most effective for use at the chair, in explaining dental conditions to patients. The series is also extremely valuable to dental societies, dental instructors, and clinicians.

The price is only \$16 and this includes appropriate lecture material. The coupon is for your

#### Titles of Slides

**Dental Conditions** 

The Progress of Tooth Decay Pyorrhea Treated or Neglected

What Does An X-Ray Show?

5. "Things Are Not Always What They Seem . "
6. The Requirements of a Correct Restoration
7. Insulation

7. Insulation
8. How Irregularities of the Teeth Affect the Face
9. How the Loss of Teeth Affects the Face
10. The Collapsed Face
11. The Action of Local Anes12. Why Construct a Bridge?
13. The Danger From the Impacted Tooth
14. The Circulation of the Blood
15. "One Rotten Apple Can Spoil a Bushel"
16. "A Little Neglect May Breed Mischief" thesia

# Control infection quickly with PHYLORINOL

An antiseptic solution powerful enough to destroy bacteria very quickly, yet so safe that it can be used full strength on delicate orificial tissue. Phylorinol is used in more and more dental schools and hospitals and is acclaimed by thousands of practitioners as the medication of choice as an adjunct in the treatment of

Gingivitis
Inflamed or Bleeding Gums
Vincent's Infection
Periodontal Pockets
Acute Third Molar Flaps
Malodorous Oral Conditions
Dry Sockets
Surgical Care
Denture Soreness
Tooth Sensitivity
Caused by Receding Gums

The combination of iodophenol and chlorophyl is many times more effective than either ingredient alone. We would like to have you prove the efficacy of Phylorinol in your own practice. Simply send \$2.00 for a trial 8 oz. bottle. Your money

will be refunded if you are not entirely satisfied. No special instruments or skills are required. Non-toxic, non-irritating. This offer is made only to dentists and physicians. Phylorinol is never advertised to the laity.

#### Two Views on Nutrition

An example of divergent basic philosophies is expressed in two points of view on nutrition, one by an American scientist, the other in a discussion by members of the British House of Lords. The American is the scientific director of the Nutrition Foundation which is a group organized and richly subsidized by some of the largest manufacturers and processors of food. This point of view emphasizes nutritional surveys, research grants, and technologic developments to improve nutrition. The talks in the House of Lords were on a less exalted scientific level and were concerned with the potential dangers in processed and chemically treated foods. Here the desire expressed was: "To increase the availability of fresh foods for the people."

The American point of view, as stated by Charles Glen King, is in part as follows:

"From a food supply point of view, we in the United States are exceedingly fortunate. We have available enough of all the nutrients to furnish an ideal diet for the entire population, plus a reserve quantity for export. Nearly everyone has access to a 'free' education. Economic resources and transportation facilities are adequate to reach nearly everyone. Protection of food supplies by industry and by public law has set a high standard for several decades; and the foods available in our markets are as attractive and flavorsome as one could find anywhere. Yet we face such records as these:

"1. Apparently only about onefourth of our population consumes a diet that well-trained scientists regard as good or excellent.

"2. At the opposite end of the picture, we have about 20 million or
